

### Description

The faceplate is used to hold the telecommunications connectors in the wall mounted or other outlet cable terminations. It is easy-to-install design and suitable for data and voice applications. Generally, straight adaptors are suitable for Category 5e & 6 installations and the angled adaptor is highly recommended for Category 6A unshielded / shielded installations. The angled adaptor design maintains the patch cords bend radius and provides extra room inside the back box for cable storage.

### Features

- Size: 86 x 86mm
- Color: White / Ivory Available
- 1, 2 Port Available.
- Unload Module Size: 25 x 50mm
- Angled Unload Module Available.
- Suitable for RJ45 and other modular snap-in keystone connectors.
- UL94 V0 Flame retardant plastic ABS
- Supplied with mounting screws and identification labels.

### Applications

- Work Area
- Data Communications

### Standards

- ANSI/TIA-568-C.2
- ISO/IEC 11801:2011 (Ed 2.2)
- CENELEC EN 50173-1:2011
- UL 94 V-0
- RoHS Compliance
