

Description

The 19" 1U/2U duct cable managers are constructed using steel and finished in powder coated black color. The duct cable manager comes with a removable front cover and a finger guide channel on the top & bottom of the channel and an opening at the rear for pass through. These finger guide channels allow the patch cords to enter/exit at any point and provide a pleasing look to the cabinet. Cable management products deliver excellent cable management support when used in conjunction with other 19" products. The cable managers are designed for use in 19" rack environments for managing patch cords that are connected between patch panels and the network switch.

Features

- Type: 1U 2" deep metal duct cable manager with snap on cover
- Compatibility: Fits any 19" EIA-310 standard cabinets or open frame rack
- Construction: Cold rolled steel to hold thick cables or multiple power cords
- Removable front cover
- Finger guide channels at the top and bottom of the cable manager
- Standard size for mounting in 19" racks and cabinets
- Cable transition from horizontal to vertical channels
