

Description

The Cat 6A UTP Blank Patch Panel is designed to work with our CAT 6A UTP high-density modular connectors. The modular connectors exceed all channel performance requirements in TIA-568-B.2-10 from 1 MHz to 500MHz to support the IEEE 802.3an standard for 10 Gigabit Ethernet over UTP premise cable.

Cat 6A UTP Solution exceeds all proposed augmented Category 6 performance requirements for support of the pending 10G Base-T application standard as set forth by TIA 568-B.10. This is supported by providing an efficient and effective method of reducing alien crosstalk (AXT) from neighboring connectors. Such performance will enable your network to support current technologies such as 10/100/1G/10G Ethernet as well as advanced new and Internet Protocol-based services.

Features

- Rack mounted snap-in Cat 6A patch panel provides excellent performance for high speed networks
- Numerical marking of ports on the front side of the panel
- Integral rear plastic cable management
- Modern design and simplified mounting
- Suitable for 10G category 6A UTP keystone jacks
- Unused ports can be covered with blanking modules

ORDERING INFORMATION

Part No	Description
APP-2624-UC6A	19 inch Cat6a Modular Unshielded blank patch panel, 24 ports, 1U.
APP-2648-UC6A	19 inch Cat6a Modular Unshielded blank patch panel, 48 ports, 1U.
